DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 11 and 15 are rejected under 35 U.S.C. 102(a or e) as being anticipated by Lee et al.
- 3. Claims 11, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Fessenden.

Lee et al discloses a system for dampening underwater energy from an energy source. Note that Fig. 3A shows bubble producing elements 111 positioned in a vertically oriented setup. Fessenden discloses a system for dampening underwater energy from an energy source (16). The system includes bubble producing elements 35 positioned in a vertically oriented manner.

Claim 11 is so anticipated by either Fessenden or Lee et al since the ship of either Lee et al or Fessenden is stationary when at port.

With respect to claim 15, the bubble producing units of Fessenden and Lee et al are vertically spaced and vertically aligned along an angle.

With respect to claim 16, see feed pipe 34 of Fessenden that anticipates the claimed "spine" and is located "substantially perpendicular" with respect to the waterline. Specifically, the top part of the spine is "substantially perpendicular" with the waterline.

4. Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Arnoldi ('466).

Note on Fig. 1 of Arnoldi, a spine (10) is shown having first and second bubble producing units (18). The spine is placed in a bed of a waterway. The structure claimed in claim 17 reads upon the structure of Arnoldi since a bed of a waterway is not perfectly horizontal, and thus the spine placed upon a non-perfectly horizontal bed would inherently include bubble producing units "vertically spaced or oriented from each other especially along a vertical contoured bed.

Allowable Subject Matter

5. Claims 5-10 and 12-14 are allowed.

Response to Arguments

6. Applicant's arguments filed September 21, 2004 have been fully considered but they are not persuasive. Specifically, with respect to claim 11, it is argued that a ship at port is "substantially stationary". With respect to claim 15, the vertically spaced and

Application/Control Number: 10/690,419 Page 4

Art Unit: 3662

aligned along an angle of the bubble producing units of Fessenden structure reads upon the claim. With respect to claims 16 and 17, the arguments are most in view of the new grounds of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (703) 306-4161. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.

Art Unit: 3662

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (703) 306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
